TARIFF FORMAT

- A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between pages already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised sheet 14 cancels the 3rd revised sheet 14.
- C. **Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I
 - 2.1.1.A.1.(a).I.(i)
 - 2.1.1.A.1.(a).I.(i).(1)
- D. **Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some sheets.) The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on file with the Commission.

Company may require a Customer to make a deposit to be held as a guarantee for the payment of charges. A deposit does not relieve the Customer of the responsibility for the prompt payment of bills on presentation. The deposit will not exceed an amount equal to two-twelfths of the estimated total for all regulated services provided by the Company for the ensuing twelve months, plus thirty percent of the monthly charges for service.

When service is discontinued or terminated, the amount of a deposit, including interest accrued to date, will be applied to the Customer's final bill. The remainder, if any, in excess of the final bill for service will be promptly refunded to the Customer in accordance with Ohio MTSS 4901:1-5-13 (B).

Deposits held will accrue interest at a rate no lower than that specified by the applicable regulatory commission and in accordance with Ohio MTSS 4901:1-17-06.

Customers whom Company believes present a credit risk may also be required to provide in lieu of a deposit, third party guarantees. Third party guarantees will be in accordance with Ohio MTSS 4901:1-5-14.

SECTION III - DESCRIPTION OF SERVICES (Continued)

3.3 Minimum Call Completion Rate

3.3.1 Customers can expect a call completion rate of 98% during peak use periods for Feature Group D Equal Access 1+ and 0 + services. The call completion rate is calculated as the number of calls completed (including calls completed to a line or to a line which remains unanswered by the called party) divided by the number of calls attempted.

3.4.2 Rate Period Overlap

3.4.2.A For messages which overlap one or more rate periods, the rate in effect at the time of call origination in the originating area applies to the entire duration of that call.

3.4.2.B Subject to the billing increments set forth in this tariff plus any additional charges which may apply, long distance usage charges are based on the actual usage of Excel's service. Usage begins when the called party picks up the receiver. When the called party picks up timing is determined by hardware answer supervision. Chargeable time ends when either party "hangs up" thereby releasing the connection. Excel does not bill for uncompleted calls.

Operator Assistance Service Charges vary depending upon the billing option selected by the caller. The following call placement options are available:

- a. **Operator Station-to-Station** - refers to when an end user requests operator assistance in reaching a telephone number and is willing to talk to anyone who answers. The call may be billed as Sent Paid (calling party pays for the call), Sent Collect (called party pays for the call), or may be billed to a Third Party Number or Calling Card. Sent Collect and Third Number Billed calls may not be allowed in locations where the Company does not have billing arrangement availability. To activate Station-to-Station Operator Services, the caller's dialing sequence could be: 0+ a 10 digit telephone number, or 00 (only), or any other Company-provided access method, to get an operator directly to request that a Station-to-Station call be placed.

- b. **Person-to-Person** - refers to when an end user requests operator assistance in reaching a specific person, department, extension, office, etc. The operator dials the number and stays on the line until the requested party is reached and conversation begins. The call may be billed as Sent Paid (calling party pays for the call), Sent Collect (called party pays for the call), or may be billed to a Third Number or Calling Card. Sent Collect and Third Number Billed calls may not be allowed in locations where the Company does not have billing arrangement availability. To activate Person-to-Person Operator Services, the caller's dialing sequence could be: 0+ a 10 digit telephone number, or 00 (only), or any other Company-provided access method, to get an operator directly to request that a Person-to-Person call be placed.

4.9 Excel Operator Services - (Continued)

4.9.1 Operator Assistance Service Charges and Surcharge Descriptions: (Continued)

- c. **Busy Line Verification** - refers to those instances where the Company will provide operator assistance to determine if there is conversation ongoing on a called station. A Service Charge is applied to all attempts to verify the condition of a customer line, busy talking, busy not talking (e.g., off hook), except attempts which are unsuccessful due to network equipment failure.

- d. **Busy Line Interruption** - refers to those instances where the Company operator will interrupt an ongoing conversation on a called station. A charge will apply each time the Company operator attempts the emergency interruption whether or not the interruption is successful. A Busy Line Verification must be made and its service charge applied before an Emergency Interruption can be attempted. Once an operator has verified the line, and the called party has agreed to accept the interruption, the Customer is provided the option of completing an operator assisted call to the called station without hanging up or originating a separate call. Customers may accept or refuse the operator's offer to complete the call. Calls completed with the operator's assistance will be charged an additional Service Charge under Station-to-Station or Person-to-Person, as applicable. If the operator dials or completes the call to the verified telephone number for the Customer, the Operator Dialed Surcharge will also apply.

- e. **Operator Dialed Surcharge** - will apply to Station-to-Station and Person-to-Person calls when the Customer has the ability to dial all the digits necessary for call completion but dials instead "0", "00" or another Company-provided access code or other Company-authorized access method to reach a Company operator to have the operator place the call. This surcharge will be incurred by the Customer in addition to the applicable Service Charge. However, the surcharge will not apply to: (1) calls which cannot be completed by the Customer due to equipment failure or trouble on the Company's network; and (2) calls placed by parties identified as handicapped and who cannot complete the calls due to the handicap.
